SUMMARY

Performance-driven Front-End Developer specializing in Angular 17 with hands-on experience building responsive, scalable, and user-friendly web applications. Proficient in TypeScript, Angular standalone components, RxJS, and REST API integration. Skilled in developing reusable UI components, optimizing application performance, and delivering clean, maintainable, and high-quality code.

EMPLOYMENT HISTORY

Web Design Trainee - National Telecommunication Institute (NTI)

09/2024 - 11/2024

- Architected 8+ responsive web pages using HTML5 and CSS3 best practices.
- Implemented Mobile-First design strategies, enhancing user accessibility.

Front-End Developer (Angular) Trainee - Route Company

July 2025 - May 2026

- Completed hands-on training in Angular, building responsive web applications using HTML, CSS, TypeScript, and Angular17 with a focus on clean code and real-world projects.

EDUCATION

Computers And Artificial Intelligence, Helwan - BS
(Information Systems)

Helwan, Cairo.

2022 - 2026

PROJECTS

Brand Evora – Production E-Commerce Platform

Angular 17 | TypeScript | Tailwind CSS | REST APIs

- Developed a production-ready e-commerce platform for a clothing brand using Angular 17.
- Built responsive and reusable UI components with Angular standalone architecture.
- Integrated REST APIs for authentication, products, categories, cart, and checkout.
- Leveraged Antigravity AI to accelerate development, improve code quality, and enhance productivity while maintaining production-ready standards.
- Focused on performance optimization, clean architecture, and maintainable code.

Egypt Gateway – Admin Dashboard

Angular | TypeScript | REST APIs

- Developed the administration dashboard for the Egypt Gateway tourism platform.
- Built responsive dashboard interfaces for managing application content and data.
- Created reusable Angular components, forms, tables, and management modules.
- Integrated REST APIs and implemented clean, maintainable frontend architecture.

E-Commerce Platform

Angular 17 | TypeScript | Bootstrap | REST APIs

- Developed a complete e-commerce web application during the Route Company Angular training.
- Implemented core Angular concepts including routing, lazy loading, standalone components, services, guards, interceptors, and reactive forms.
- Integrated REST APIs for authentication, product browsing, shopping cart, wishlist, and checkout.
- Applied Angular best practices to build a modular and maintainable application architecture.

DocCure – Medical Platform (UI)

HTML5 | CSS3 | JavaScript | Bootstrap

- Developed a responsive medical platform user interface during the NTI training program.
- Designed modern interfaces for patients and healthcare services.
- Built reusable UI components using Bootstrap.
- Optimized layouts for desktop and mobile devices
